

Sarnafil® T Clean

Cleaner for heavily soiled Sarnafil® T

Product Description

Mixture of organic solvents

Uses

Sarnafil® T Clean is a cleaner to remove heavy soiling and adhesive residues from Sarnafil® TG/TCG and TS/TCS membranes.
Sarnafil® T Clean is also suitable for cleaning tools and degreasing metal sheets.

Characteristics / Advantages

- Dissolves surface dirt
- Evaporates quickly
- Suitable for heavily stained seam overlaps of Sarnafil® T/TC membranes
- Highly flammable

Tests

Approvals / Standards

- Quality management system EN ISO 9001

Product Data

Form

Consistency

liquid

Colour

red

Packaging

Canister: 2 l,
Packing unit: Europallet or single canister

Storage

Storage Conditions

Store in dry conditions at temperatures between 0 °C and +30 °C

Shelf-Life

24 months from date of production if stored properly in original, unopened and undamaged sealed canister. Expiry date on canister.

Technical Data

Chemical Basis

Mixture of organic solvents

Density

0.88 kg/l (+20 °C)

Roofing

System Information

Processing Requirements / Limits

Ambient Temperature At least -20 °C

Substrate Temperature At least -30 °C

Limits Avoid contact to materials that are not resistant to solvents.

Processing

Application Guideline Based on the valid installation instructions of the relevant roof waterproofing membrane.

Application Method Depending on the degree of soiling, the subjected area should be cleaned first with water, brush or cleaning pad. Soak a clean white cloth with Sarnafil® T Clean and then clean the membrane, tool or metal sheet. The cloths should be changed frequently to avoid the spreading of dirt. When cleaning seams a new cloth is to be used. Allow Sarnafil® T Clean to evaporate completely. In seam areas allow Sarnafil® T Clean to evaporate completely before preparing the seams with Sarnafil® T Prep.

Notes of Application / Limits In seam areas Sarnafil® T Clean can only be used for cleaning purposes and may not be used as seam preparation. Sarnafil® T Clean reduces the seam quality and should only be used on heavily soiled areas. White cloths will effectively absorb dirt and the colour will not stain the membrane. Use solvent resistant gloves and eye protection glasses during application. Sarnafil® T Clean contains high volatile and flammable solvents. Application in closed rooms is allowed only with sufficient room ventilation. Smoking and open fire are not permitted.

Value Base

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

Local Restrictions

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

Health and Safety Information

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Material Safety Data Sheet containing physical, ecological, toxicological and other safety-related data.

All data in our product information are based on our current knowledge and experience. They do not release users from careful testing of the application and strict observation of the relevant processing regulations because of the wide range of possible influences during the application and use of our products. Legally valid assurances of specific characteristics or suitability for special purposes of application other than those provided in our documentation for the specific product cannot be inferred from our information. Any protective rights or existing laws and provisions must be followed by the recipient or processor of our products at their own responsibility. Moreover our general terms and conditions of sale and guarantee are valid.
