

Visqueen Liquid Gas Membrane Reinforcing Strip, 300mm x 100m

Features and benefits

- Complete system - complements liquid waterproofing systems as a reinforcement
- Complete system - ensures concrete joints are gas and waterproof
- Barrier properties - resistant to alkalies in cement
- Multi-use -easy applications and adaptable on any surface
- Excellent elasticity - enhances the overall performance of liquid waterproofing systems.

Product description

The reinforcing strip is a synthetic non woven textile reinforcing band available in 300mm x 100m roll format.

Approvals and standards

- Quality Management System ISO 9001:2015

Usage

To be used in conjunction with Visqueen Liquid Gas Membrane in construction joints, and horizontal and vertical junctions.

System components

Find your local stockist

Visqueen Liquid Gas Membrane Reinforcing Strip, 300mm x 100m

Storage and handling

Please keep in a warm (above 5°C), dry covered area in its current packaging.

Preparation

Where necessary the strip should be cut with a sharp retractable safety knife or robust scissors.

Installation

Construction joints and horizontal to vertical junctions should be reinforced by pre-treating with a coat of Visqueen Liquid Gas Membrane at a coverage rate of 0.5 litre/m² applied minimum 175mm either side of the joint or junction, and into which is fully bedded Visqueen Liquid Gas Membrane Reinforcing Strip.

Usable temperature range

It is recommended that Visqueen Liquid Gas Membrane and all associated system components should not be used below 5°C

Additional information

Visqueen Liquid Gas Membrane Reinforcing Strip, 300mm x 100m

Property	Method	Unit	
Weight	ISO 9864	gsm	70
Thickness	ISO 9863 – 1	mm	0.65
Tensile Strength MD	EN ISO 10319	KN/m	1.8
Tensile Strength TD	EN ISO 10319	KN/m	4.2
Static indentation	EN ISO 12236	N	500

Health and safety information

Please refer to material safety datasheet

Visqueen Technical Support

Visqueen combine an extensive product portfolio with industry leading levels of service and support which includes guidance over the phone, bespoke CAD drawings to help with complex detailing, electronic NBS specifications and access to a dedicated team of highly knowledgeable and experienced field based Technical Support Managers.

Visqueen Technical Support is available to all our customers including architects, specifiers, distributors, builders merchants, contractors and end users. All of our technical team have been awarded the industry recognised qualification Certificated Surveyor in Structural Waterproofing (CSSW).

Visqueen CPD Seminars

The Visqueen Continuing Professional Development (CPD) Seminars provide up-to-date information on changes within Building Regulations/Building Standards and nationally recognised industry guidance affecting damp proofing, water vapour control, hazardous ground gas protection and below ground structural waterproofing.

The one hour seminars have been produced for design specialists within the construction sector and are delivered by our team of Technical Support Managers.

Visqueen PI designs and special projects

From initial design to the completed project, Visqueen are with you every step of the way. Whether it be hazardous ground gas protection and/or below ground waterproofing protection employing barrier, structurally integral or drained systems, Visqueen can offer professional indemnity (PI) insurance for bespoke Visqueen design solutions.

Visqueen Technical Support Managers work with all stakeholders to provide cost effective Visqueen solutions offering complete peace of mind throughout the construction phase and beyond.

Visqueen Training Academy

Based at our manufacturing facility in Derbyshire, the Visqueen Training Academy is available to support Visqueen customers throughout the UK by providing a wide range of both theory and practical skills related training.

Courses include one day product awareness training for our distributors and builders merchants to help them in their day-to-day jobs, through to intensive three day courses giving detailed hands-on training in the practical skills required for safe and robust product installation.
