

Sovereign Hey'di Powder X

A rapid setting-plugging compound used to stop water leaks pre-tanking.

Product Code

5kg: **30806221**

15kg: **30126590**

Description

Sovereign Hey'di Powder X is a rapid setting- plugging compound used to stop water leaks prior to tanking with the Hey'di K11 System and is also used in conjunction with Powder No 1 and Sealing Liquid as part of Hey'di Special System.

The Sovereign Hey'di tanking system is fully covered by British Board of Agrément Certificate 91/2608.

Form Supplied: Dry Powder

Pack Size: 5 kg & 15 kg

Colour Range: Grey

Contains: Cement and additives

Properties

Hey'di Powder X sets in seconds forming a waterproof plug preventing water ingress.

PREPARATION

To be used once the masonry has been prepared ready for tanking and where water is permeating through an isolated spot. Plug the leak with Hey'di Powder X prior to tanking.

USAGE

Use a gloved hand to pick up some powder and, wearing goggles, press firmly over the leak and smooth off. Hey'di Powder X will set in only a few seconds.

If plugging one point creates another leak elsewhere then contact the Technical Sales Area Manager for advice.

If Hey'di Powder X is to be used along a wall/floor joint or overhead then it may be easier to make a thick slurry. Pour about a cupful of water into a clean bucket. With a gloved hand add 2 - 3 handfuls of powder, stir quickly and apply immediately.

Hey'di Powder X should not be used independently of the Hey'di K11 System for long-term leak prevention.

Storage: Between 5°C - 30°C. above ground in dry conditions.

Shelf Life: 12 months in unopened bags.

HEALTH AND SAFETY

- ! Contact between cement powder and body fluids (e.g. sweat and eye fluids) may cause irritation, dermatitis or burns.
- ! There is a risk of serious damage to eyes. Wear suitable protective clothing, gloves and eye/face protection.
